Overview

I am an experienced web designer and developer with expertise in both front-end and back-end development. I specialize in creating visually appealing and user-friendly websites using technologies like React, Svelte, Adonis, and Laravel. My strengths include responsive interfaces, efficient APIs, and MySQL database management.

Projects

UBuilder Content Management System

Innovative content management system with drag-and-drop functionality using Svelte and Node.js.

GitHub: github.com/ubuilder

Espinkala Online Store

Backend development for a robust and scalable solution with Hamyarsystem team.

Website: Espinkala.com

Gym Management System

User-friendly scheduling app built with React and PHP.

GitHub: github.com/EdrissAria/NirooGym

Note Pad Web App

The Note Pad App is a versatile and intuitive application designed to help users effortlessly create, organize, and manage their notes and to-do lists

GitHub: github.com/note-pad-app

Movies Mobile App

The Movies Mobile App is a cutting-edge application developed using React Native, specifically designed to cater to movie enthusiasts.
